Haider Kamal

Game Developer (Unity/C#) | Multiplayer | AR / VR | Blockchain Games | Blender, Mirror, PlayFab Server APIs

Rawalpindi, Punjab, Pakistan

Summary

As a Game Developer with 5 years of experience, passionate about building immersive, fun, and scalable experiences, I specialize in creating 3D games using Unity3D, C#, and Blender. With experience working both independently and within collaborative teams, I bring a methodical and results-driven mindset to every project—whether it's a mobile battle royale, a multiplayer system, or a blockchain-integrated experience.

Experience

Ideofuzion

Sr. Game Developer

May 2023 - Present (3 years 5 months)

Islāmābād, Pakistan

O-Laser Run (Android & iOS)

- Designed and developed a cross-platform obstacle-running game inspired by UIPM Laser Run and Wipeout
- Implemented Unity state machines for smooth, responsive player interactions
- Built custom real-time multiplayer via socket server and added Facebook friend challenges and leaderboards to boost engagement

Games-fi (Play-to-Earn)

- Engineered core gameplay loops around Tron and multiple cryptocurrencies for in-game earnings and withdrawals
- Developed NFT minting/trading systems and a secure raffles hub offering exclusive, high-value rewards
- Ensured seamless blockchain integration and user flows for a frictionless P2E experience

Stunt-Z (Off-Road Racing)

- Created a realistic jeep-racing game with advanced vehicle physics, particle effects, and NOS boosts across 150+ tracks

- Optimized asset delivery using Google Play Asset Delivery and managed version control workflows
- Synchronized dynamic biomes from server-side to enhance immersion and maintain consistent world state

Alam Digital HQ

Game Developer

September 2021 - March 2023 (1 year 7 months)

Rawalpindi, Punjab, Pakistan

Project Zambeel (PC Open-World AAA)

- Led design and development of a GTA-inspired, third-person story-driven open-world game set on a tropical mafia-boss island
- Built a dynamic mission and narrative system to drive player engagement and branching story paths
- Integrated high-fidelity asset pipelines and performance optimizations to achieve AAA-quality visuals

Valet Parking (Android Simulation)

- Developed an HD vehicle-parking simulator on Android, featuring realistic physics and intuitive touch controls
- Created a level-based grading system that calculates performance scores and unlocks new challenges
- Optimized 3D asset streaming and memory usage to maintain stable framerates across a range of devices

Many other Android games including:

- Rush hour run
- Pakdam Pakdai
- Space Shooter
- Hold'em Poker
- Paper Boy

Coding Cannon

Game Developer

January 2017 - September 2021 (4 years 9 months)

Operation Basalat (Android Multiplayer)

- Engineered a team-based Android shooter where players, as army operatives, coordinate to force militants from a school and rescue children
- Implemented real-time client-server networking, objective-driven gameplay loops, and AI pathfinding for dynamic combat scenarios

- Designed in-game UI feedback and balancing to ensure clear player roles and smooth cooperative play

Source House General Trading L.L.C

Ecommerce Marketing Manager

January 2019 - December 2020 (2 years)

- Led regional marketing initiatives—social media, email campaigns, and SEO—to drive brand awareness and customer acquisition across the GCC
- Designed and developed a responsive e-commerce website, integrating secure payment gateways and real-time inventory management
- Managed online sales channels on Dubizzle and Souq, optimizing product listings, pricing strategies, and promotions to maximize conversions and revenue

INSTRUMED (Pvt.) Ltd.

Information Technology Officer

March 2015 - December 2019 (4 years 10 months)

Sialkot, Punjab, Pakistan

Freelancer.com

Graphic Designer

January 2015 - December 2017 (3 years)

Education

National University of Sciences and Technology (NUST)

Master of Science - MS, Computer Software Engineering · (September 2020 - March 2022)
